Brightleaf Solutions Recognized as one of the Top 20 Most Promising Company by SiliconIndia

For its unique state of art technology and consistent quality services to its customers

Brookline, MA – Brightleaf Solutions, Inc., a leading provider of automated contract data extraction and migration services, announces that it has been selected as a Top 20 Most Promising Company of 2018 by SiliconIndia.

Brightleaf provides a technology powered service to extract information from contracts using its own proprietary semantic intelligence/natural language processing technology, its own team of lawyers to check the output, and its own Six-Sigma process to deliver end-to-end, highly accurate, extracted data. This data and original documents are typically migrated into a Contract Lifecycle Management (CLM) system.

“Clients struggle with the notion of migrating their legacy contracts into a CLM System. With Brightleaf’s technology powered approach, this cumbersome problem of extraction of meta-data from contracts is solved accurately and succinctly. The data then can be migrated along with the original contractual documents into a CLM system for reporting and queries - thereby greatly enhancing the investment in these systems” stated Samir Bhatia, CEO. He continued “It is an honor to be recognized as a Top 20 company for 2 years in a row by such a prestigious magazine like SiliconIndia.”

Sagaya Christuraj, Managing Editor of SiliconIndia stated, “Brightleaf is at the forefront of data extraction software development and the industry as a whole. It was easy to select Brightleaf for this award as they have consistently provided fantastic results and customer satisfaction. How they handle each engagement and their dedication to perfection falls right in line with what we look for in a Top 20 Company. With Brightleaf’s unique approach it is easy to see why so many companies trust only them to do this work “.

ABOUT BRIGHTLEAF SOLUTIONS, INC.

Brightleaf provides a technology powered service to extract information from your contracts using our own proprietary semantic intelligence/natural language processing technology, our own team of lawyers to check the output, and our own Six-Sigma process to deliver end-to-end, highly accurate, extracted data from your contracts.

Legacy contract documents along with this extracted meta-data can be migrated into a Contract Lifecycle Management (CLM) System for tracking and reporting. The data can be virtually anything, and it is customized for each of your type of contracts. All meta-data, terms and conditions, legal provisions, and even all obligations (which are usually scattered throughout your contracts) are extracted by our software. This extracted data is checked by our team of lawyers, and provided in a format for easy upload into any system, ([download Strategy Brief](#)).

This allows you to leverage the knowledge in your existing contracts, report on the extracted data, even recover hidden revenue (e.g. by policing penalty clauses in your supplier agreements) and comply with current and upcoming regulations.
